10/27/08 - Dynamic Quest Completes SAS70 Type II Certification

GREENSBORO, N.C. - Dynamic Quest, a business solutions provider focusing on- Technology, Marketing, and Business Processes, receives a Type II SAS70 Certification, an internationally recognized auditing standard developed by the American Institute of Certified Public Accountants (AICPA).

To become SAS70 certified, Dynamic Quest had its control policies and procedures evaluated and tested by an independent party. As a result, Dynamic Quest clients are now able to obtain a detailed description of company controls and an independent assessment of their effectiveness.

A SAS70 audit is widely recognized because it represents that an organization has been through an in-depth audit. This certification differentiates Dynamic Quest, from other IT and Data Center service providers in the area, by demonstrating the establishment of effectively designed control objectives and control activities.

As one of the highest industry-accepted auditing standards, a SAS70 certification provides Dynamic Quest clients with certainty that the company's data center services meet superior standards for security and appropriate controls. The company's state-of-the-art data center, constructed to provide the highest level of security and protection of the servers and applications hosted within, includes biometric security, video cameras, firewalls, anti-virus server, redundant power solutions, and 24/7 helpdesk support.

About Dynamic Quest: Dynamic Quest, founded and based in Greensboro, is one company providing multiple solutions in the areas of technology, marketing and business processes. The company offers IT, Data Center hosting, and disaster recovery solutions for businesses across several different industries. For data center specifications, services and other Dynamic Quest solutions, visit www.dynamicquest.com.
