

VPN Virtual Private Networks

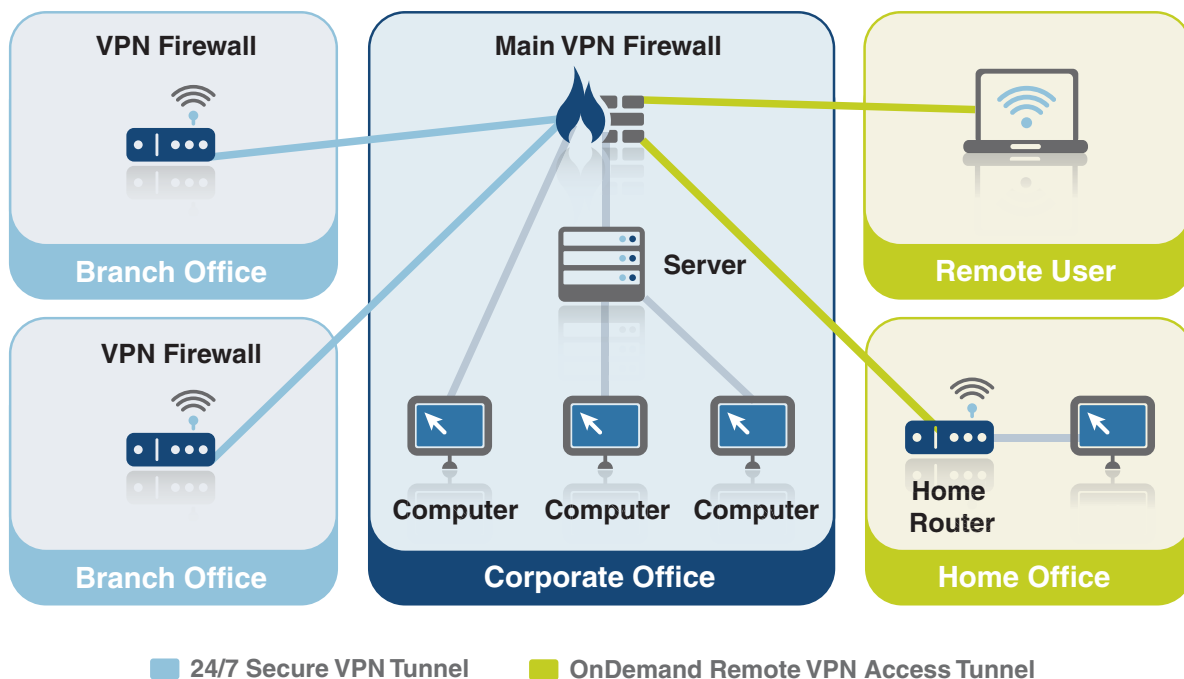

Benefit from convenient and secure remote access

With a VPN solution, your organization will benefit from convenient and secure remote access to corporate resources. Dynamic Quest has the experience in both site-to-site and remote access VPN architectures and will work with you to determine the best solution to fit your business needs. Our team is trained to build, manage and support your VPN.

VPNs have two major functions which are utilized within an organization:

- Providing a **24/7 secure VPN tunnel** between two or more office locations
- Providing secure **OnDemand remote VPN** access to a corporate network from any remote individual

Key Benefits:

- Cost Savings
- Flexibility
- Privacy
- Security

Key Features:

- Single common network infrastructure for two or more locations
- Security for your company files and protection of company data
- Easy access to company files, email, and data from anywhere
